TeleGit: AI-Powered Project Management in Telegram

Transform your project management with TeleGit, a Telegram-native AI assistant. It seamlessly syncs your ideas, bugs, and todos from chat directly into GitHub issues.

by Denis Perov

The Problem: Overcomplicated Project Management Tools

Bloated Features

Modern PM tools like Jira and Asana quickly become overwhelming. They are packed ofter unnecessary features.

Simple Needs

Most teams simply need to record and organize ideas, bugs, and todos. They want to do it quickly.

Chat Limitations

Chat apps are fast and familiar. But they lack structured project capture capabilities.

The Solution: AI-Powered Project Management in Telegram

💬 **Natural Language Capture**

Log project info in chat using natural language and hashtags.
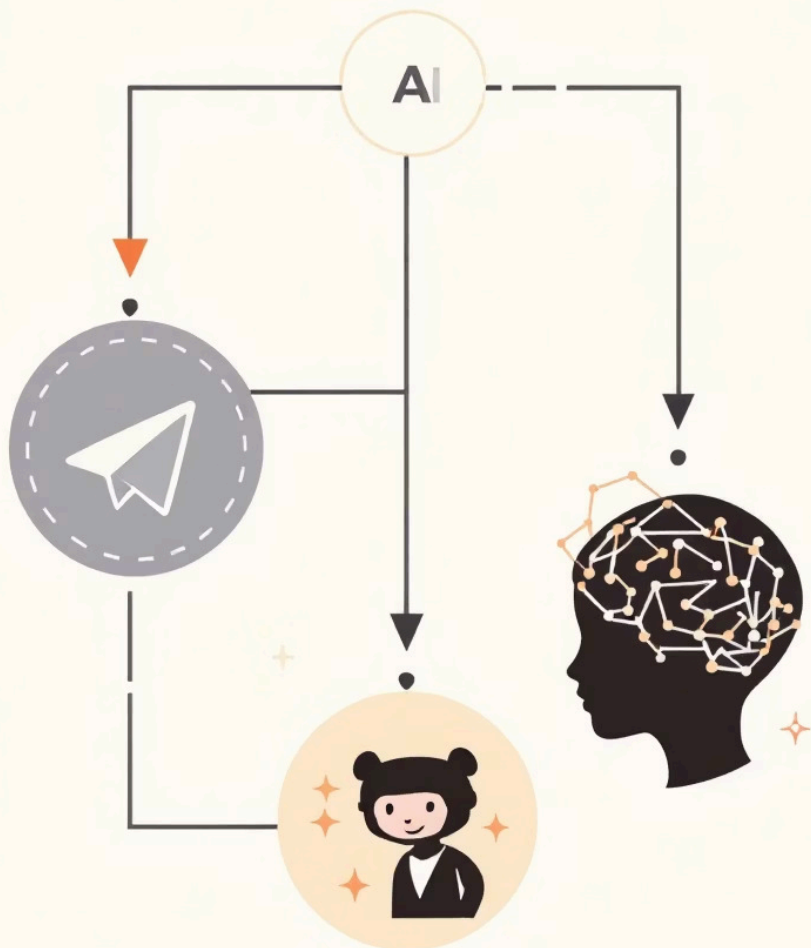

🤖 **AI Classification**

The Telegram bot analyzes, classifies, and syncs entries. It creates structured GitHub issues.

⚡ **Frictionless Workflow**

No forms, no context-switching. Enjoy frictionless capture and instant results.

How TeleGit Works

1 **Send Message**

User sends a message in Telegram mentioning the bot or uses hashtags like **#idea**, **#bug**, **#todo**, or **#act**

2 **AI Processing**

The bot uses an LLM to categorize and summarize the message content.

3 **GitHub Integration**

Bot posts the issue to GitHub. It reacts with emojis and replies in chat.

Dynamic Feedback Loop

Work Progress

Bot reacts with 👀 or 🤔 to reflect work progress.

2

1

3

Categorized Outcome

Bot reacts with 👾, 🫡, 🦄, or 👌 for categorized outcomes.

Issue Link

Bot replies with a message. It contains a link to the created or updated GitHub issue.

Key Technologies & Integration

Telegram Bot API

Powers the group chat interface for user interactions.

## Telegram Bot MCP Server

Handles LLM progress report updates within Telegram.

GitHub MCP Server

Enables seamless integration with GitHub and LLM.

OpenAI Agent SDK

For running AI inference and orchestrating various tools.

Made with GAMMA

Why Now? Market & Business Value

1

Mobile-First PM

Teams demand fast, mobile-first PM tools with zero learning curve.

2

Chat-First Async

Hybrid and remote work needs chat-first, async project capture.

3

Expandable Market

Huge potential beyond GitHub to Trello, Jira, Notion, and more.

Roadmap & Extensibility

1

SaaS Solution

Launch TeleGit as a scalable Software-as-a-Service offering.

2

More PM Tools

Add support for GitHub Projects, Trello, Notion, and Jira.

3

Smarter AI

Introduce custom workflows, advanced analytics, and intelligent summaries.

Takeaways & Call to Action

Unlock rapid, intelligent project capture for any team. Say goodbye to tool overload.

- Join our alpha testing program.

- Provide valuable feedback.

- Partner with us for future collaborations.
